

**WORLD LEADERS
IN BOLUS
TECHNOLOGY**

PRODUCT GUIDE

ABOUT US...

AGRIMIN LTD. specialises in developing, manufacturing and marketing controlled and sustained release trace element, vitamin and mineral boluses for ruminants. The company has gained a reputation for technically advanced products, many of which have been developed in house and researched extensively in New Zealand.

Our bolus products are sold throughout Ireland by the animal health supply trade, including farm retailers, co-ops, merchants, pharmacies and veterinary surgeons. We have established significant export markets throughout Europe and in other developed agricultural economies. Farmers in countries as diverse as Iceland, New Zealand, Russia and Mexico are recognising the benefits our boluses can bring to their livestock.

AGRIMIN BOLUSES

Helping you ...make the **right choice**
...at the **right time** ...for the **right animal!**

CONTROLLED & SUSTAINED RELEASE BOLUS TECHNOLOGY

Our bolus range encompasses different technologies, all of which are designed to deliver a controlled quantity of nutrients to an individual animal over a defined period of time.

All of our boluses are designed to dissolve completely, leaving the reticulum free of any bolus residue.

THE BENEFITS OF BOLUSES

Farmers use boluses for a number of reasons:

CERTAIN SUPPLY - with our boluses, you know that each animal is receiving a consistent supply of nutrients. Variation of intake is a major issue with free access supplementation.

SUSTAINED RELEASE - our boluses give a genuinely sustained supply of nutrients, ensuring that animals are receiving supplementation every minute of every day of the active life of the product.

LABOUR SAVING - once administered, our boluses save the time and cost put into daily feeding or checking the availability of free access products.

COST EFFECTIVE - there is no waste with our boluses and costs compare very favourably with other forms of supplementation.

TRACE ELEMENT BOLUSES FOR GROWING CATTLE

DESCRIPTION

A sustained release bolus containing iodine, cobalt and selenium. Intended for growing cattle on grass or forage based diets with a liveweight of 200-400 kg.

24-7 SMARTRACE® GROWING CATTLE is designed for situations where iodine, cobalt and selenium supplementation is essential for efficient growth, optimum health and fertility but where additional copper is not required.

24-7 SMARTRACE® GROWING CATTLE supplies the animal's full daily requirement of each essential trace element for 180 days.

ACTIVE COMPONENT	DAILY SUPPLY OVER 180 DAYS FROM 130 g BOLUS
Iodine	18.7 mg
Cobalt	2.2 mg
Selenium	1.0 mg

BENEFITS

- Eroding technology means consistent supply of trace elements
- Delivers full daily requirement of iodine, cobalt and selenium
- Free of copper – important for closely managed dairy cows
- Approved by Organic Farmers & Growers
- Contains no GMOs or material of animal origin
- Active life 180 days

ADMINISTRATION

- One 130 g bolus should be given to each animal
- Always use the approved Agrimin cattle bolus applicator A
- Pack size - 10 boluses

TRACE ELEMENT BOLUSES FOR GROWING CATTLE

DESCRIPTION

A sustained release bolus containing copper, iodine, cobalt and selenium. Intended for growing cattle on grass or forage based diets with a liveweight of 200-400 kg.

24-7 SMARTRACE® PLUS GROWING CATTLE is designed for situations where iodine, cobalt and selenium supplementation is essential for efficient growth, optimum health and fertility and where additional copper is required.

24-7 SMARTRACE® PLUS GROWING CATTLE supplies the animal's full daily requirement of each essential trace element for 180 days.

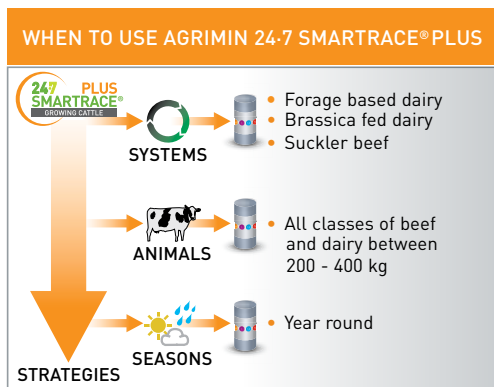

ACTIVE COMPONENT	DAILY SUPPLY OVER 180 DAYS FROM 150 g BOLUS
Copper	93.3 mg
Iodine	18.7 mg
Cobalt	2.2 mg
Selenium	1.0 mg

BENEFITS

- Eroding technology means consistent supply of trace elements
- Delivers full daily requirement of copper, iodine, cobalt and selenium
- Approved by Organic Farmers & Growers
- Contains no GMOs or material of animal origin
- Active life 180 days

ADMINISTRATION

- **One 150 g bolus should be given to each animal**
- **Always use the approved Agrimin cattle bolus applicator A**
- **Pack size - 10 boluses**

TRACE ELEMENT BOLUSES FOR ADULT CATTLE

DESCRIPTION

A sustained release bolus containing iodine, cobalt and selenium. Intended for adult cattle on grass or forage based diets with a liveweight over 400 kg.

24-7 SMARTRACE® ADULT CATTLE is designed for situations where iodine, cobalt and selenium supplementation is essential in the run up to calving and service where additional copper is not required.

24-7 SMARTRACE® ADULT CATTLE supplies the animal's full daily requirement of each essential trace element for 180 days.

ACTIVE COMPONENT	DAILY SUPPLY OVER 180 DAYS FROM 160 g BOLUS
Iodine	23.0 mg
Cobalt	2.7 mg
Selenium	1.2 mg

BENEFITS

- Eroding technology means consistent supply of trace elements
- Delivers full daily requirement of iodine, cobalt and selenium
- Free of copper – important for closely managed dairy cows
- Strong healthy calves
- Easier, cleaner calvings
- Optimise conception rates
- Reduced calving spread
- Approved by Organic Farmers & Growers
- Contains no GMOs or material of animal origin
- Active life 180 days

ADMINISTRATION

- One 160 g bolus should be given to each animal
- Always use the approved Agrimin cattle bolus applicator A
- Pack size - 10 boluses

TRACE ELEMENT BOLUSES FOR ADULT CATTLE

DESCRIPTION

A sustained release bolus containing copper, iodine, cobalt and selenium. Intended for adult cattle on grass or forage based diets with a liveweight over 400 kg.

24-7 SMARTRACE® PLUS ADULT CATTLE is designed for situations where iodine, cobalt and selenium supplementation is essential in the run up to calving and service and where additional copper is required.

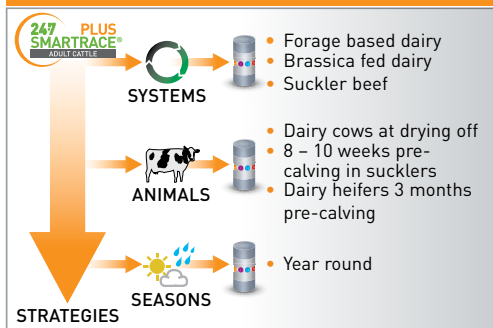

24-7 SMARTRACE® PLUS ADULT CATTLE supplies the animal's full daily requirement of each essential trace element for 180 days.

ACTIVE COMPONENT	DAILY SUPPLY OVER 180 DAYS FROM 195 g BOLUS
Copper	140.0 mg
Iodine	23.0 mg
Cobalt	2.7 mg
Selenium	1.2 mg

BENEFITS

- Eroding technology means consistent supply of trace elements
- Delivers full daily requirement of copper, iodine, cobalt and selenium
- Strong healthy calves
- Easier, cleaner calvings
- Optimise conception rates
- Reduced calving spread
- Approved by Organic Farmers & Growers
- Contains no GMOs or material of animal origin
- Active life 180 days

WHEN TO USE AGRIMIN 24-7 SMARTRACE® PLUS

ADMINISTRATION

- One 195 g bolus should be given to each animal
- Always use the approved Agrimin cattle bolus applicator A
- Pack size - 10 boluses

SMARTRACE® is a registered trademark of Agrimin Ltd.

TRACE ELEMENT BOLUSES FOR LAMBS

DESCRIPTION

A sustained release bolus specifically designed for lambs, containing iodine, cobalt and selenium. Intended for ruminating lambs with a liveweight over 25 kg.

24-7 SMARTRACE® LAMB is designed for situations where iodine, cobalt and selenium supplementation is essential for growing, ruminating lambs to help maintain and maximise growth rates, ensuring strong vital lambs.

24-7 SMARTRACE® LAMB supplies the animal's full daily requirement of each essential trace element for 120 days.

ACTIVE COMPONENT	DAILY SUPPLY OVER 120 DAYS FROM 2 x 6 g BOLUSES
Iodine	0.9 mg
Cobalt	0.8 mg
Selenium	0.2 mg

BENEFITS

- Eroding technology means consistent supply of trace elements
- Delivers full daily requirement of iodine, cobalt and selenium
- Free of copper – OK for use in continental breeds
- Helps maintain lamb growth from weaning
- Promotes strong healthy lambs
- Approved by Organic Farmers & Growers
- Contains no GMOs or material of animal origin
- Active life 120 days

ADMINISTRATION

- 2 x 6 g boluses should be given to each animal
- Always use the approved Agrimin lamb bolus applicator C
- Pack size - 200 boluses (enough for 100 lambs)

TRACE ELEMENT BOLUSES FOR ADULT SHEEP

DESCRIPTION

A sustained release bolus containing iodine, cobalt and selenium. Intended for adult sheep, gimmers and hogs with a liveweight over 40 kg.

24-7 SMARTRACE® ADULT SHEEP is designed for situations where iodine, cobalt and selenium supplementation is essential in the run up to tupping, at scanning or over-wintering. It can also be given to rams in advance of the mating season.

24-7 SMARTRACE® ADULT SHEEP supplies the animal's full daily requirement of each essential trace element for 180 days.

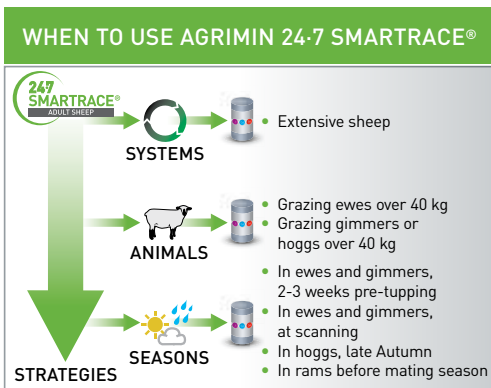

ACTIVE COMPONENT	DAILY SUPPLY OVER 180 DAYS FROM 48 g BOLUS
Iodine	4.2 mg
Cobalt	0.8 mg
Selenium	0.4 mg

BENEFITS

- Eroding technology means consistent supply of trace elements
- Delivers full daily requirement of iodine, cobalt and selenium
- Free of copper – OK for use in continental breeds
- Helps maintain ewe health through winter
- Optimise lambing percentages
- Helps maintain lamb vitality
- Approved by Organic Farmers & Growers
- Contains no GMOs or material of animal origin
- Active life 180 days

ADMINISTRATION

- One 48 g bolus should be given to each animal
- Always use the approved Agrimin sheep bolus applicator A
- Pack size – 50 boluses

TRACE ELEMENT BOLUSES FOR ADULT SHEEP

DESCRIPTION

A sustained release bolus containing copper, iodine, cobalt and selenium. Intended for adult sheep, gimmers and hogs with a liveweight over 40 kg.

24-7 SMARTRACE® PLUS ADULT SHEEP is designed for situations where copper, iodine, selenium and cobalt supplementation is essential in the run up to tupping, at scanning or over-wintering. Can also be given to rams in advance of the mating season. Do not use this product in breeds susceptible to copper toxicity or in sheep that may be housed for prolonged periods and fed concentrates. If in doubt, consult your veterinary surgeon or nutritionist.

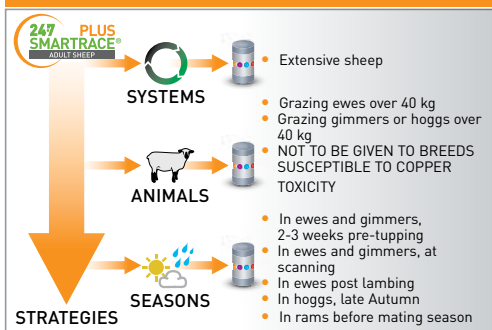

24-7 SMARTRACE® PLUS ADULT SHEEP supplies the animal's full daily requirement of each essential trace element for 180 days.

ACTIVE COMPONENT	DAILY SUPPLY OVER 180 DAYS FROM 52 g BOLUS
Copper	18.7 mg
Iodine	4.2 mg
Cobalt	0.8 mg
Selenium	0.4 mg

BENEFITS

- Eroding technology means consistent supply of trace elements
- Delivers full daily requirement of copper, iodine, cobalt and selenium
- Helps maintain ewe health through winter
- Optimise lambing percentages
- Helps maintain lamb vitality
- Approved by Organic Farmers & Growers
- Contains no GMOs or material of animal origin
- Active life 180 days

WHEN TO USE AGRIMIN 24-7 SMARTRACE® PLUS

ADMINISTRATION

- One 52 g bolus should be given to each animal
- Always use the approved Agrimin sheep bolus applicator A
- Pack size - 50 boluses

SMARTRACE® is a registered trademark of Agrimin Ltd.

TRACE ELEMENT BOLUSES FOR DAIRY COWS

DESCRIPTION

A short term, sustained release bolus containing calcium.

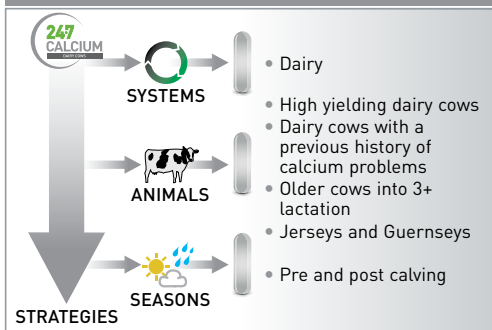

Intended for use in adult dairy cows over 400 kg liveweight, at calving.

ACTIVE COMPONENT	EACH 203 g BOLUS CONTAINS 43 g OF CALCIUM
Calcium Chloride (E509)	56%
Calcium Sulphate (E516)	23%

BENEFITS

- Large supply of calcium – 43 g in each bolus
- Bolus dissolves and supplies calcium within 50 minutes of administration
- Calcium from bolus available as chloride (fast release) and sulphate (slow release) – peace of mind for the farmer
- None of the palatability problems associated with gels and pastes
- Can be used in conjunction with existing calcium supplementation regime

WHEN TO USE AGRIMIN 24·7 CALCIUM

ADMINISTRATION

1. Pre and post calving regime:

Administer one bolus at the first sign of calving.

Administer a second bolus 12-15 hours after the first bolus.

2. Post calving regime:

Administer one bolus immediately after calving (or after sub-cutaneous calcium injection).

Administer a second bolus 12-15 hours after the first bolus.

- Pack size - 12 boluses
- Always use the approved Agrimin cattle bolus applicator C.

COPPER BOLUSES FOR CATTLE

DESCRIPTION

A sustained release bolus containing 27 g copper oxide. Intended for growing cattle and breeding cows on grass or forage based diets.

24·7 COPPER CATTLE is designed for situations where soil and forage copper levels are low or where known copper antagonists such as molybdenum, iron and sulphur are high.

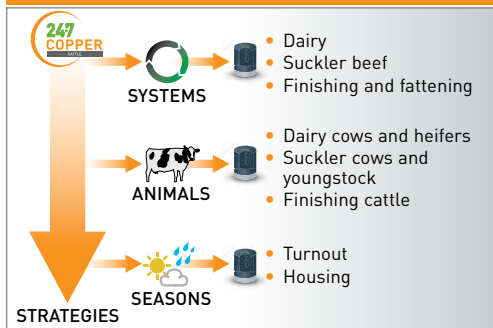

24·7 COPPER CATTLE supplies the animal's daily requirement of copper over a period of 180 days.

ACTIVE COMPONENT	EACH BOLUS CONTAINS
Copper (as copper oxide rods)	23 g (27 g copper oxide)

BENEFITS

- Optimise growth rates in youngstock and finishing animals
- Optimise coat condition
- Easy to administer
- No capsule means no breakages or damage prior to or during administration
- Approved by Organic Farmers & Growers
- Contains no GMOs or material of animal origin
- Active life 180 days

WHEN TO USE AGRIMIN 24·7 COPPER

ADMINISTRATION

- **Ruminating cattle under 250 kg**
- Administer one bolus
- **Cattle over 250 kg**
- Administer one or two boluses
- **Always use the approved Agrimin cattle bolus applicator B**
- **Pack size**
- 24 boluses

COPPER CAPSULES FOR SHEEP

DESCRIPTION

24·7 COPPER SHEEP are long acting capsules for the oral administration of copper to sheep. Intended for adult sheep, with a liveweight over 40 kg, on grass or forage based diets.

24·7 COPPER SHEEP is designed for situations where soil and forage copper levels are low or where known copper antagonists such as molybdenum, iron and sulphur are high.

24·7 COPPER SHEEP capsules are designed to maintain normal copper levels over the whole grazing season (approximately 6 months).

Do not use this product in breeds susceptible to copper toxicity or in sheep that may be housed for prolonged periods and fed concentrates. If in doubt, consult your veterinary surgeon or nutritionist.

ACTIVE COMPONENT	EACH CAPSULE CONTAINS
Copper (as copper oxide rods)	3.4 g (4 g copper oxide)

BENEFITS

- Optimise growth rates
- Optimise fleece condition
- Easy to administer
- Active life 180 days

ADMINISTRATION

- **Adult sheep over 40 kg - one 4 g capsule**
- **Always use the approved Agrimin sheep bolus applicator B**
- **Pack size - 250 capsules**

COPPER CAPSULES FOR LAMBS

DESCRIPTION

24·7 COPPER LAMB are long acting capsules for the oral administration of copper to ruminating lambs. Intended for ruminating lambs, with a liveweight over 20 kg, on grass or forage-based diets.

24·7 COPPER LAMB is designed for situations where soil and forage copper levels are low or where known copper antagonists such as molybdenum, iron and sulphur are high.

24·7 COPPER LAMB capsules are designed to maintain normal copper levels over the whole grazing season (approximately 6 months).

Do not use this product in breeds susceptible to copper toxicity or in lambs that may be housed for prolonged periods and fed concentrates. If in doubt, consult your veterinary surgeon or nutritionist.

ACTIVE COMPONENT	EACH CAPSULE CONTAINS
Copper (as copper oxide rods)	1.7 g (2 g copper oxide)

BENEFITS

- Optimise growth rates
- Optimise fleece condition
- Easy to administer
- Active life 180 days

ADMINISTRATION

- **Ruminating lambs over 20 kg - one 2 g capsule**
- **Always use the approved Agrimin lamb bolus applicator D**
- **Pack size - 250 capsules**

TRACE ELEMENT BOLUSES FOR CATTLE

DESCRIPTION

A sustained release bolus containing 6 trace elements and 3 vitamins. Designed for grazing or forage fed livestock with a liveweight over 150 kg.

ALL-TRACE® CATTLE helps farmers manage the trace element status of their herd over critical periods of the production cycle.

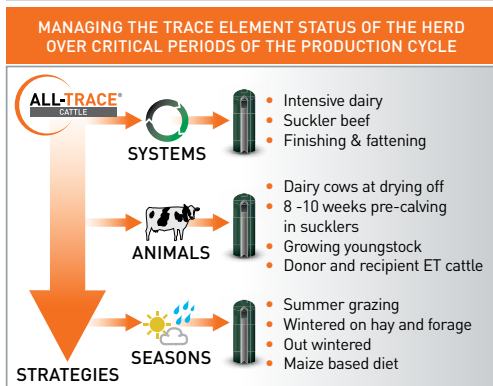

ACTIVE COMPONENT	DAILY SUPPLY OVER 240 DAYS FROM 2 BOLUSES
Copper	136.0 mg
Cobalt	2.0 mg
Iodine	4.4 mg
Manganese	70.5 mg
Selenium	2.1 mg
Zinc	114.1 mg
Vitamin A	3,725.0 i.u.
Vitamin D ₃	745.0 i.u.
Vitamin E	6.4 i.u.

BENEFITS

- Optimise growth rates in youngstock
- Easier, cleaner calvings
- Strong healthy calves
- Reduced calving spread
- Optimise conception rates
- Optimise general condition
- Both boluses applied in one single, simple application
- Full range of trace elements
- Active life 240 days

ADMINISTRATION

- **Administer 2 boluses per animal (over 150 kg)**
- **Always use the approved Agrimin cattle bolus applicator A**
- **Pack size - 20 boluses**

TRACE ELEMENT BOLUSES FOR CATTLE

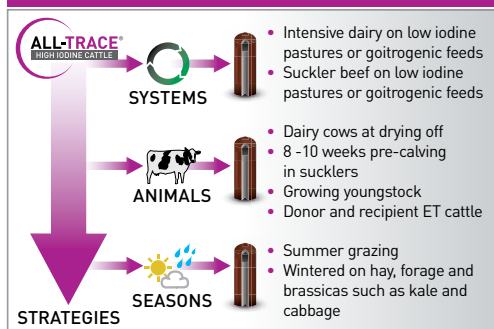

DESCRIPTION

A sustained release bolus containing 6 trace elements and 3 vitamins. Designed for grazing or forage fed livestock with a liveweight over 150 kg where an imbalance of iodine affects animal productivity.

ALL-TRACE® HIGH IODINE CATTLE helps farmers manage the trace element status of their herd over critical periods of the production cycle.

ACTIVE COMPONENT	DAILY SUPPLY OVER 180 DAYS FROM 2 BOLUSES
Copper	175.1 mg
Cobalt	2.6 mg
IODINE	19.2 mg
Manganese	90.7 mg
Selenium	2.7 mg
Zinc	147.0 mg
Vitamin A	4,780.0 i.u.
Vitamin D ₃	956.0 i.u.
Vitamin E	8.2 i.u.

MANAGING THE TRACE ELEMENT STATUS OF THE HERD OVER CRITICAL PERIODS OF THE PRODUCTION CYCLE

BENEFITS

- Optimise growth rates in youngstock
- Easier, cleaner calvings
- Strong healthy calves
- Reduced calving spread
- Optimise conception rates
- Optimise general condition
- Both boluses applied in one single, simple application
- Full range of trace elements
- Active life 180 days

ADMINISTRATION

- **Administer 2 boluses per animal (over 150 kg)**
- **Always use the approved Agrimin cattle bolus applicator A**
- **Pack size - 20 boluses**

TRACE ELEMENT BOLUSES FOR ORGANIC CATTLE

DESCRIPTION

A sustained release bolus containing 6 trace elements. **ALL-TRACE® ORGANIC CATTLE** is approved by the Organic Farmers and Growers Association and is compliant with current EC standards.

Designed for organically reared, grazing or forage fed livestock with a liveweight over 150 kg.

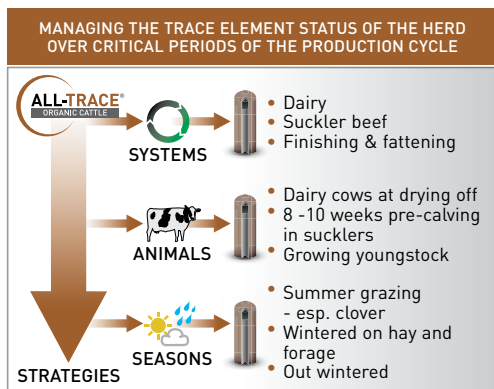

ACTIVE COMPONENT	DAILY SUPPLY OVER 180 DAYS FROM 2 BOLUSES
Copper	195.2 mg
Cobalt	2.9 mg
Iodine	6.3 mg
Manganese	101.1 mg
Selenium	3.0 mg
Zinc	163.8 mg

BENEFITS

- Approved by Organic Farmers & Growers
- Contains no GMOs or material of animal origin
- Optimise growth rates in youngstock
- Easier, cleaner calvings
- Strong healthy calves
- Reduced calving spread
- Optimise conception rates
- Optimise general condition
- Both boluses applied in one single, simple application
- Active life 180 days

ADMINISTRATION

- Administer 2 boluses per animal (over 150 kg)
- Always use the approved Agrimin cattle bolus applicator A
- Pack size - 20 boluses

TRACE ELEMENT BOLUSES FOR CATTLE

DESCRIPTION

In-vivo dissolution studies have shown that **ALL-TRACE® BIOTIN GOLD CATTLE** delivers the target level of 20 mg per head per day of biotin over 120 days. Not only this, **ALL-TRACE® BIOTIN GOLD CATTLE** will also deliver the full daily requirement of copper, cobalt, selenium and iodine and useful contributions of zinc, manganese and vitamins A, D³ and E. Designed for grazing or forage fed dairy cows and heifers with a liveweight over 400 kg.

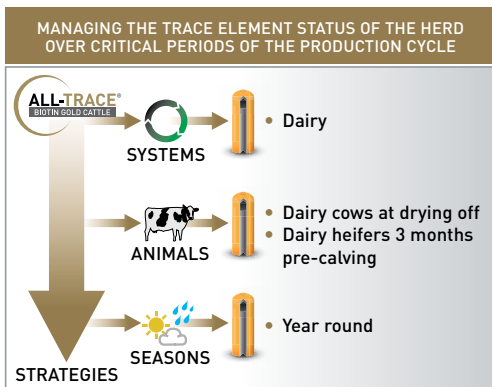

ACTIVE COMPONENT	DAILY SUPPLY OVER 120 DAYS FROM 2 BOLUSES
BIOTIN	19.3 mg
Copper	96.9 mg
Cobalt	4.0 mg
Iodine	17.6 mg
Manganese	153.1 mg
Selenium	2.4 mg
Zinc	257.7 mg
Vitamin A	7,553.0 i.u.
Vitamin D₃	1,511.0 i.u.
Vitamin E	19.5 i.u.

BENEFITS

- Delivers a target level of 20 mg per head per day of Biotin over 120 days
- Promotes hoof and horn strength
- Easier, cleaner calvings
- Strong healthy calves
- Reduced calving spread
- Optimise conception rates
- Optimise general condition
- Both boluses applied in one single, simple application
- Active life 120 days

ADMINISTRATION

- **Administer 2 boluses per animal (over 400 kg)**
- **Always use the approved Agrimin cattle bolus applicator A**
- **Pack size - 20 boluses**

TRACE ELEMENT BOLUSES FOR CALVES

DESCRIPTION

A sustained release bolus containing 6 trace elements and 3 vitamins. Designed to provide ruminating calves over 6 weeks of age that proportion of their dietary requirement of trace elements and vitamins that are not adequately supplied by grass or forage based diets.

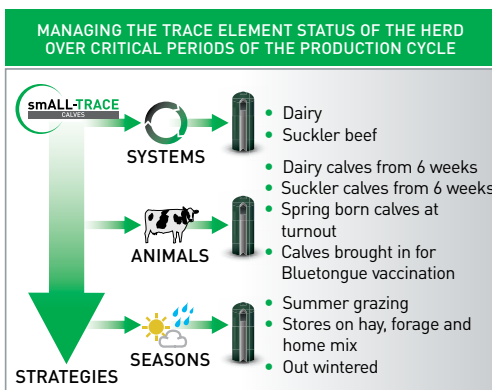

ACTIVE COMPONENT	DAILY SUPPLY OVER 180 DAYS FROM 2 BOLUSES
Copper	61.5 mg
Cobalt	1.1 mg
Iodine	2.3 mg
Manganese	38.2 mg
Selenium	0.6 mg
Zinc	55.9 mg
Vitamin A	2,019.0 i.u.
Vitamin D ₃	404.0 i.u.
Vitamin E	5.2 i.u.

BENEFITS

- Optimise growth rates
- Optimise general condition
- Supply nutrients throughout grazing period
- Both boluses applied in one single, simple application.
- Full range of trace elements
- Active life 180 days

ADMINISTRATION

- Administer **2 boluses per animal (over 6 weeks of age)**
- Always use the approved Agrimin cattle bolus applicator B
- Pack size - 10 boluses

TRACE ELEMENT BOLUSES FOR SHEEP

DESCRIPTION

A sustained release bolus containing 6 trace elements and 3 vitamins. Designed to provide grazing adult sheep with a liveweight over 40 kg that proportion of their dietary requirement of six trace elements and three vitamins that are not adequately supplied by grass or forage based diets.

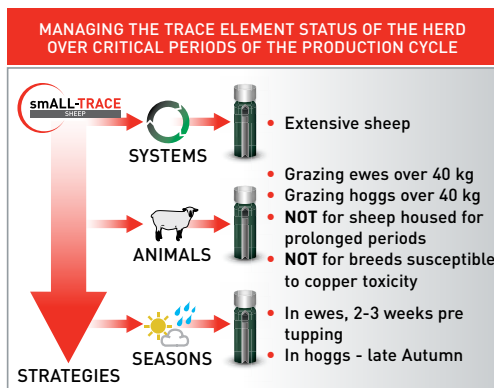

ACTIVE COMPONENT	DAILY SUPPLY OVER 180 DAYS FROM 1 BOLUS
Copper	21.61 mg
Cobalt	0.53 mg
Iodine	1.92 mg
Manganese	16.83 mg
Selenium	0.25 mg
Zinc	24.63 mg
Vitamin A	886.0 i.u.
Vitamin D ₃	177.0 i.u.
Vitamin E	2.7 i.u.

BENEFITS

- Supply nutrients through to lambing
- Help maintain ewe health through winter
- Optimise conception rates
- Optimise lambing percentages
- One bolus and one grinder applied in one single, simple application.
- Full range of trace elements
- Active life 180 days

ADMINISTRATION

- **Administer 1 bolus and 1 grinder per animal (over 40 kg)**
- **Always use the approved Agrimin sheep bolus applicator A**
- **Pack size - 40 boluses**

MAGNESIUM BULLETS FOR CATTLE AND SHEEP

DESCRIPTION

A sustained release bolus containing an alloy of magnesium, copper and aluminium. Licensed to aid the prevention of hypomagnesaemia in cows and ewes grazing rapidly growing spring grass. **RUMBUL** helps farmers manage the magnesium status of their herd or flock over high risk periods.

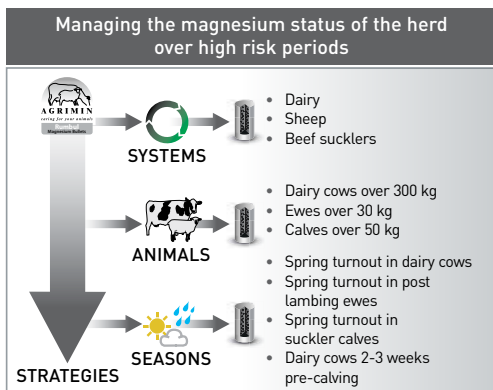

PRODUCT	ACTIVE LIFE	ADMINISTRATION
RUMBUL MAGNESIUM CATTLE	28 DAYS	2 BULLETS
RUMBUL MAGNESIUM SHEEP	21 DAYS	1 BULLET
RUMBUL MAGNESIUM CALF	21 DAYS	2 BULLETS

BENEFITS

- LM licensed as an aid to the prevention of hypomagnesaemia in cattle, sheep and calves
- Certain supply of magnesium during high risk period
- Use pre calving to help boost magnesium intake
- Active life:
Cattle - 28 days
- Active life: Sheep/
Calves - 21 days

ADMINISTRATION

- Dairy cows over 300 kg liveweight
- Ewes over 30 kg liveweight
- Calves over 50 kg liveweight
- Always use the approved Agrimin cattle bolus applicator A on Rumbul Cattle, B on Rumbul Calf and sheep bolus applicator A on Rumbul Sheep
- Pack size:
Cattle - 10 bullets
- Pack size: Sheep/
Calves - 20 bullets

POLYTHENE LIFE JACKETS FOR LAMBS

DESCRIPTION

LAMMAC® are polythene jackets which provide protection against the elements for a newly born lamb and help prevent hypothermia which is the major cause of lamb mortality in temperate regions such as the UK.

COLOUR	PACK SIZE	DESCRIPTION
STANDARD CLEAR	100	In clear polythene. Farmers can see mark on lambs through jacket.
LARGE ORANGE	100	Vital protection for lowland or crossbred lambs. Orange gives excellent visibility against all backgrounds.
LARGE CLEAR	100	In clear polythene. Farmers can see mark on lambs through jacket.

BENEFITS

- Reduced risk of hypothermia
- Provide protection during un-forecast adverse weather
- No interference with mothering
- Protection provided for a few pence per head
- Reportedly less fox predation in lambs wearing jackets
- Ultra violet light degradable

ADMINISTRATION

- Put onto lambs immediately prior to turnout or within a few hours of birth
- Designed to stay on the lamb for up to 72 hours
- Pack size - Units of 100

TESTIMONIALS

" Blood tests showed that there were inconsistencies in selenium and copper and after talking to other farmers and our vet, we decided to use Agrimin's boluses, which even 25 years ago were technically advanced in the marketplace. These boluses provide an extremely efficient technology and are now a standard part of my herd management. "

DAVID DUGDALE, NORTH YORKSHIRE

" I think there's a lot in this whole area of micro-nutrition and supporting the animal at key stages of the breeding cycle,"Sion says "People tend to think of trace elements only being relevant if there is a deficiency, but if you can get the delivery side of things right, there's a growing body of evidence suggesting that maintaining the correct levels throughout the breeding cycle can produce distinct advantages too. "

SION AND CLAIRE WILLIAMS, CARMARTHENSHIRE

" Our problems arose from a coarse sandy soil over sandstone rock that can produce good pasture in spring and autumn but is droughty in the summer and has inherent mineral deficiencies. Having decided to use Agrimin's sustained release ALL-TRACE® HIGH IODINE boluses we have seen in the last year a reduction in retained placentas from 20% to just 2% and numerous health and fertility benefits. This has convinced me that I now have the upper hand. "

ROB TAVERNER, DEVON

" Although there are no specific trace element problems known on any of the land used, ensuring all ewes have adequate levels of key trace elements at all times throughout the breeding cycle is a critical part of the system. From just available grazing and by-product feeds supported by a cobalt, iodine and selenium trace element bolus last year we had less barren ewes, the sheep were fitter despite being on very poor grazing and I reckon we saw a 15 - 20% improvement in lambing percentage overall. For a pound a bolus I reckon that's pretty good going, particularly when you can spend £1000 very easily on bagged minerals and not know which, if any, animals are getting enough. "

PHILIP WEAVER, NOTTINGHAMSHIRE

BOLUS APPLICATOR IDENTIFICATION

3 YEAR GUARANTEE

We offer a 3 year guarantee for all of our NZ designed and built applicators. Details of the guarantee will be supplied with every applicator sold.

AGRIMIN CATTLE BOLUS APPLICATOR A

USE WITH:

- 24·7 SMARTRACE® GROWING CATTLE
- 24·7 SMARTRACE® PLUS GROWING CATTLE
- 24·7 SMARTRACE® ADULT CATTLE
- 24·7 SMARTRACE® PLUS ADULT CATTLE
- ALL-TRACE® CATTLE
- ALL-TRACE® HIGH IODINE
- ALL-TRACE® ORGANIC
- ALL-TRACE® BIOTIN GOLD
- RUMBUL CATTLE

Only for use in cattle weighing over 150 kg

AGRIMIN CATTLE BOLUS APPLICATOR B

USE WITH:

- 24·7 COPPER CATTLE
- smALL-TRACE CALVES
- RUMBUL CALF

Only for use in cattle weighing over 150 kg

AGRIMIN CATTLE BOLUS APPLICATOR C

USE WITH:

- 24·7 CALCIUM DAIRY COWS

Only for use in cattle weighing over 400 kg

Care should always be taken when bolusing. ALWAYS refer to the applicator instructions provided. If unsure contact Agrimin for further guidance.

AGRIMIN SHEEP BOLUS APPLICATOR A

USE WITH:

- 24·7 SMARTRACE® ADULT SHEEP
- 24·7 SMARTRACE® PLUS ADULT SHEEP
- smALL-TRACE SHEEP
- RUMBUL SHEEP

Only for use in sheep weighing over 40 kg

AGRIMIN SHEEP BOLUS APPLICATOR B

USE WITH:

- 24·7 COPPER SHEEP

Only for use in sheep weighing over 40 kg

AGRIMIN LAMB BOLUS APPLICATOR C

USE WITH:

- 24·7 SMARTRACE® LAMB

Only for use in lambs weighing over 25 kg

Please note the screw on adaptor heads/cups are interchangeable, allowing for one Sheep / Lamb Bolus Applicator to be used for all of Agrimin's Sheep and Lamb product range.

AGRIMIN LAMB BOLUS APPLICATOR D

USE WITH:

- 24·7 COPPER LAMB

Only for use in lambs weighing over 20 kg

Care should always be taken when bolusing.
ALWAYS refer to the applicator instructions provided.
If unsure contact Agrimin for further guidance.

TRIAL DATA

All of our boluses have been rigorously researched and then tested under practical farming conditions in a number of different countries. In most cases, the trials have been conducted independently and the results published in peer reviewed journals.

CANADA

Maintaining copper levels in cattle bolused with ALL-TRACE® and grazing high molybdenum pasture.

SCOTLAND

Lower somatic cell counts in cows given ALL-TRACE® at drying off.

IRELAND

Copper and selenium responses in groups of beef cattle given ALL-TRACE® at grass.

MEXICO

Reduced still births and retained placentas in dry cows given ALL-TRACE®.

NEW ZEALAND

Blood and liver copper and selenium responses in cattle given 24·7 SMARTRACE® PLUS boluses.

These trial results help prove the quality and efficacy of our product range and are available to anyone - please contact us for details or look at our website:
