

INFORMATION SHEET – 24·7 SMARTRACE® LAMB

Presentation

A 6 g bolus containing the following trace elements:

Nutritional Additives	Product Composition	Average daily supply over 120 days from 2 boluses
Iodine (Calcium iodate)	8,592 mg/kg	0.9 mg
Cobalt (Cobalt carbonate)	8,481 mg/kg	0.8 mg
Selenium (Sodium selenate)	1,656 mg/kg	0.2 mg

Uses

A dietetic complementary feed for the long-term supply of grazing lambs with trace elements. Intended for ruminating lambs with a liveweight over 25 kg. Agrimin **24·7 SMARTRACE® LAMB** is designed for situations where iodine, cobalt and selenium supplementation is essential for growing, ruminating lambs to help maintain and maximise growth rates, ensuring strong vital lambs.

24·7 SMARTRACE® LAMB boluses are designed to lie in the reticulum. Two boluses are administered at the same time. These erode and dissolve thus providing a continuous and regular supply of nutrients to the animal over its 120-day active life. The bolus dissolves completely leaving no residue in the reticulo/rumen.

Simultaneous supplementation of additives with a maximum content from other sources to those incorporated in a bolus, if applicable, shall be avoided.

Before using, it is recommended to have advice from a veterinarian or nutritionist concerning:

1. The balance of trace elements in the daily ration
2. The trace element status of the flock

Administration

Administer two 6 g boluses per animal

24·7 SMARTRACE® LAMB can be used in the following group of livestock: grazing lambs, store lambs, finishing lambs and replacement breeding stock over 25 kg liveweight

Always use the recommended Agrimin lamb bolus applicator C
